- Jira

## EDUCATION

**BA MULTIMEDIA**  
Calicut University,  
2020-2023

## PROFESSIONAL SUMMARY

Passionate and self-taught Flutter developer with a solid foundation in Dart and Flutter, experienced in building Android applications and integrating Firebase services. Proficient in handling JSON data and committed to continuous learning to stay current with emerging technologies in mobile app development. A collaborative team player, eager to contribute and bring value to dynamic development teams.

## PROJECTS

### QUIZ WEB APP | HARIS AND CO. | [GitHub](#)

Developed an Independence Day special quiz web app for Haris Co. using Flutter and Firebase. The app is designed to engage users with a series of themed quiz questions, providing a smooth and interactive experience.

### E-COMMERCE [GitHub](#)

Developed a user-side mobile shopping application using Flutter and Firebase. The app provides a smooth shopping experience where users can browse products, manage a cart, and place orders. Firebase was integrated for user authentication and data management..

### NEWS APP [GitHub](#)

Developed a user-side mobile news application using Flutter and News API. The app offers a smooth reading experience, allowing users to explore trending news, browse categories, and view hot topics. News API was integrated for real-time news updates, while Firebase handled user authentication and data management for personalized content.

### CHATBOT APP [GitHub](#)

Developed a chatbot application using Flutter and Gemini API. The app provides an interactive experience where users can have real-time conversations, get instant answers, and explore various topics. Gemini API powered the chatbot's responses, while Firebase managed user authentication and chat history for a personalized experience.

## MINI PROJECTS

### WEATHER APP | [GITHUB](#)

- Developed using Flutter, Dart and weather API.
